

Mini-Grid Locations in Tanzania

This product is a partnership with World Resources Institute, New Ventures and Tanzania Traditional Energy Development Organization.

This map shows the locations of 109 mini-grids in Tanzania by technology.

WRI and partners are currently collecting and verifying census and other data that can be used to highlight potential markets for distributed energy sources.

Entrepreneurs will be able to identify regional and district level market opportunities for distributed renewables. Governments on the other hand will be able to identify areas where private finance will play a limited role to better allocate public finance for electricity access.

- Cities
- Mini Grid
 - Biomass
 - Fossil Fuel
 - Hybrid
 - Solar
 - Hydro
- Transmission Grid
 - Planned Transmission
 - Existing Transmission
